

Membership Report to SEA AGM 22nd June 2019

1. Membership and affiliations

1.1. At the time of writing, there were 673 “live” membership records, of which 92% were paid-up members and affiliates. To show change in membership over time, I use an annual count as at 31st May as a benchmark. **Individual membership** has increased significantly as the chart below shows.

2. Financial impact

2.1. The effect on income of increased membership has been to increase available resources, though it looks as though this may now have peaked.

Paul Martin (Membership Secretary)
